TYPOGRAPHY

Montserrat

Recommended for headings and CTAs

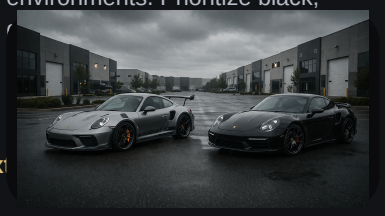
Use a bold, clean sans serif for premium but modern energy. Montserrat works well for service titles, pricing cards, hero text, and button labels.

Inter

Recommended for body copy and form text

PHOTOGRAPHY DIRECTION

Use dark, polished vehicle photography with soft contrast, clean reflections, and upscale environments. Prioritize black,



LAYOUT PRINCIPLES

Favor strong dark sections, generous spacing, clean cards, and clear 1-primary-CTA sections. Keep corners rounded. Let gold act as an accent, not the whole interface.

- **12 px radius minimum**
- **Max-width content sections**
- **Short premium copy**
- **Simple top nav + phone CTA**

DO / DON'T

DO

- Use short luxury-leaning headlines.
- Keep gold as an accent, not the background.
- Use dark, high-end detailing photography.
- Keep cards and pricing sections visually simple.

DON'T

- Do not use bright random colors.
- Do not mix many font families.
- Do not overcrowd sections with too much copy.
- Do not place the logo on busy low-contrast backgrounds.

Suggested headline stack: Montserrat Bold for hero + section titles, Inter for body copy, cards, service descriptions, and forms. This system fits the current Shine for a Cause website while giving Claude Code clear reusable tokens and component rules.
